

Gp Capt Ashok K Singh, is a post graduate mechanical engineer, an aeronautical engineer, and an MBA in HR. He has undergone a professional residential course in Marketing Management from MDI Gurgaon.

He has a wide experience in aerospace and defence markets; specially focused at India. He has three decades of service in the Indian Air Force, while he has garnered a great deal of experience by serving PSUs, DPSUs and corporates!

In the IAF, he was instrumental in inducting Mi 17s helicopters as well as Israel Aerospace Industries UAVs Herons & Searchers.

He was a Cat A Flight Engineer on medium lift transport aircraft. He gained significant experience by serving at a Base Repair Depot where Mi 17 Helicopters were overhauled.

He has executed projects on tactical communication for DRDO lab, and won contracts for the same with special forces as well as paramilitary forces! He was trained on Additive Manufacturing (3D Printing) by Stratasys! He gained a good experience in this field of Industry 4.0 manufacturing technology. As the advisor to the distributor of US based Markforged 3D Printer company steered successfully with the team setting up of a COE for Additive Manufacturing for SAIL.

He has two years of research on precision weapons. He is conversant with the DAP 2020 and consulted companies from India and overseas with successful business closures.

He helped both Indian and foreign companies in writing of contracts and thereafter closing of the sales.

He has travelled several nations and forged rewarding businesses.

His vast and checkered experience can be of a great value for a company or an individual having interests in Aerospace and Defence markets.
